

Leon Ward

Biography

The name is Leon Ward.

I was born in Wilmington, NC. I have always had an itch for art, watercolor, models, drawing. I took an art class in junior high school and high school. It has always brought me peace. I have worked for Ford, GM, Kia as a mastertech since I was 19. I painted cars, trucks on the side and built and raced many circle track cars. My family has always been into racing so design was in my blood, but I also struggle with Parkinson's now so my work is slow. Some days I can't draw at all. I like to think that a part of my soul goes into each piece I do.
